BAS – Beat Absorber System

OneAir Srl

Technical solutions for the air diffusion in the environment.

The proposed solutions are verified through the software ONECFD, Computational Fluid Dynamics, and defined by the internal technical department of the company.

The flexibility of our solutions, the definition of specific solutions tailored to the customer's projects allow to OneAir to offer the best solution according the technical characteristics of the environment.

Technology promoter and not only manufacturer this is the spirit of our activity.
